

Manual Raise Arm Barriers

Heavy Duty Manual Barrier

The SW5000HD manual raise arm barrier is a low maintenance cost effective way of manually controlling access to unauthorised areas.

It covers roadway spanning up to 9 metres. Dual barriers are available with a central locking mechanism to suit wider spans.

The SW5000 heavy duty comes complete with a lockable end rest, padlock and keys. No mounting plate is required as M16 anchor shield bolts are also included.

Each barrier can be custom designed to suit your company, with a variety of colour schemes available. Standard colours: Red/white or yellow/black.

SW5000HD
